

I am planning to use a full page for my landing page, so when I found this full-page Bootstrap Carousel, I was intrigued. [mobirise.com/bootstrap-carousel/full-width-carousel.html](http://mobirise.com/bootstrap-carousel/full-width-carousel.html)

The pro is the gallery is full screen and you do not have any distractions.

The cons are that some people do not like something that takes up their whole screen.
